

Additional Resources for Fill Stations

What is cost to use the Fill Station?

No cost (free) to the user.

What size containers can I use at the Fill Station?

Containers must be 5 gallons or less. However, there is no limit on the number of containers you may fill

How do I clean and sanitize water containers for use at the Fill Station?

For your safety, use only clean containers intended for drinking water. Containers used for milk, juice or any other substance should not be used for water intended for human consumption.

Follow the steps below to clean and sanitize water storage containers prior to filling with drinking water:

1. Wash the storage container and rinse completely with water.
2. Sanitize a 5-gallon container with a solution made by mixing 1 teaspoon of unscented liquid household chlorine bleach in one quart of water.
3. Cover the container tightly and shake it well. Make sure the sanitizing bleach solution touches all inside surfaces of the container.
4. Wait at least 30 seconds and then pour the sanitizing solution out of the container.
5. Let the empty sanitized container air-dry before use OR rinse the empty container with already available clean, safe water.
6. Dispense clean water into the sanitized container and cover with a tight lid.

How do I store clean drinking water obtain from the Fill Station?

1. Ensure the water container is covered with a tight lid.
2. Label container as "*Drinking Water*" and include storage date.
3. Do not store water longer than three months.
4. Keep stored water in a cool dry place.
5. Do not store water containers in direct sunlight.
6. Do not store water containers in areas where hazardous or unsanitary substances, such as gasoline, pesticides, or animals are present.
